MEMORANDUM

FROM: FOREST SUPERVISOR
TO: FILE
SUBJECT: LAKE CUSHMAN EMERGENCY CLOSURE
FILE CODE: 1950

BACKGROUND AND NEED:

The intent of this document is to identify and state the purpose and need for an emergency full area closure of the Lake Cushman corridor to all use. The closure area consists of National Forest System Roads 24 and 2451, Forest Service Trails 814, 876, and 872, and the area immediate adjacent to FS Roads 24 between section 7 and the Olympic National Park boundary in Section 3 located within the Hood Canal Ranger District of the Olympic National Forest as described below and shown in Exhibits A, B, and C. This emergency closure action is needed due to changed use patterns in 2020 which are impacting employee and visitor safety.

PUBLIC SCOPING:

This emergency action has been discussed with partner landowners and interested parties and has full support and agreement. These neighboring landowners are also implementing closures of their lands within the area to mirror Forest Service actions. This is in response to unsafe conditions which have been commented on by the public.

NEPA REVIEW:

Based on a review of the proposed order and consultation with District and Forest resource specialists, I have concluded that the restrictions included in this closure order were evaluated in the Cushman Hydroelectric Project EIS (FERC/EIS-0095F). I have determined that there are no extraordinary circumstances associated with this use restriction.

CIVIL RIGHTS IMPACT ANALYSIS:

This temporary restriction does not meet the criteria requiring a CRIA according to Department Regulation No. 4300-4 dated 9/22/1993, which states a CRIA is needed for:

- New legislation or amendments to existing legislation proposed by the agency
- New or revised agency regulations or instructions
- Budget proposals
- Grants, contracts, loans, or project approvals or disapprovals
- Reorganizations

- Office consolidations, closures or relocations

Nor do Public Use Restrictions meet the criteria identified in the USDA Forest Service, Washington Office, Civil Rights Impact Analysis Guide which references actions such as:

- Legislative proposals, policies, programs or projects for which an environmental impact statement (EIS) is needed
- Changes in or new rules, regulations or policies to be published in the Federal Register and not requiring an EIS
- Decision affecting program delivery which will not be published in the Federal Register
- Proposed locations or relocations of field installations involving permanent employees
- Revisions of the Forest Service Directive System

Accordingly, I have determined that this closure will have no impacts on civil rights as it will apply to all individuals. No one group or person will be affected more than another group or person.

SUMMARY:

Based on my review, I have determined that this Forest Order is compliant with the Forest Order process and should be authorized.
